**Diagnostic Imaging Department
222 Medical Circle
Morehead, KY 40351
Office: 606-783-6761
Fax: 606-783-6935**

Patients:
These are the instructions for your
scheduled procedure in our
Diagnostic Imaging Department.

Scheduling

Your examination has been scheduled for:

Date: _____ **Time:** _____ **A.M./P.M.**

The above time has been reserved for you. Please arrive 15 minutes before the appointed time so you can register. When you arrive to register, please follow the guidelines below to know where to sign in:

Admitting/Registration - 6:30 a.m. to 11:00 p.m.
Emergency Room Registration - 11:00 p.m. to 6:30 a.m.

Purpose

This procedure is performed in order to evaluate the salivary glands that procedure saliva for obstruction or stone.

Preparation

This procedure requires the use of a contrast agent. You may have heard it referred to as "x-ray dye". If you are diabetic, currently breastfeeding, allergic to shellfish or iodine or have had a previous reaction to contrast agent or "x-ray dye", please inform your physician or the Diagnostic Imaging staff before your procedure by calling the Diagnostic Imaging Department at 606-783-6761.

Procedure

Saliva is made in several glands and empties through small openings in the mouth. A small tube will be placed into the opening inside of the mouth. A liquid that shows up on imaging is injected through the tube and a series of images will be taken. You may experience a pressure feeling when the liquid is injected. After images are completed the tube will be removed. The total exam time takes approximately 45 minutes.

Results

The radiologist will review your exam and a report will be sent to your physician. Your physician will then discuss your results with you. The technologist will be unable to give you any information or interpretation about the results of your exam.

If you have questions concerning your upcoming procedure, please call the Diagnostic Imaging Department at 606-783-6761.
