## Families with Children

According to the most recent the American Community Survey estimates, $31.8 \%$ of all occupied households in the report area are family households with one or more child(ren) under the age of 18. As defined by the US Census Bureau, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

## Population Age 65

An estimated $14.03 \%$ percent of the population in the report area according to the U.S. Census Bureau American Community Survey 2010-14 5-year estimates. An estimated total of 7,744 older adults resided in the area during this time period. The number of persons age 65 or older is relevant because this population has unique health needs which should be considered separately from other age groups.

| Report Area | Total Population | Population Age 65 | Percent Population Age 65 |
| :--- | :--- | :--- | :--- |
| Report Area | 55,214 | 7,744 | $14.03 \%$ |

## Population with Limited English Proficiency

This indicator reports the percentage of the population aged 5 and older who speak a language other than English at home and speak English less than "very well." This indicator is relevant because an inability to speak English well creates barriers to healthcare access, provider communications, and health literacy/education.

| Report Area | Total <br> Population | Population <br> Age 5 | Population <br> Age 5 with <br> Limited <br> English <br> Proficiency | Percent <br> Population Age 5 <br> with Limited <br> English <br> Proficiency |

## Population Geographic Mobility

This indicator reports information about population in-migration by assessing changes in residence within a one year period. Of the 54,472 persons residing in the report area, an estimated $9.93 \%$ relocated to the area, according to the latest American Community Survey 5 -year estimates. Persons who moved to a new household from outside of their current county of residence, from outside their state of residence, or from abroad are considered part of the in-migrated population. Persons who moved to a new household from a different household within their current county of residence are not included.

## Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 623 persons in the report area are of foreign birth, which represents $1.13 \%$ of the report area population. This percentage is less than the national rate of $12.95 \%$.

## Hispanic Population

The estimated population that is of Hispanic, Latino, or Spanish origin in the report area is 581 . This represents $1.05 \%$ of the total report area population, which is less than the national $16.62 \%$ rate. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Hispanic, Latino, or Spanish may be of any race.

## Gateway Wellness Coalition

## Social \& Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

## Social \& Economic Factors

## Children Eligible for Free/Reduced Price Lunch

Within the report area 5,595 public school students or 66.03\% are eligible for Free/Reduced Price lunch out of 8,473 total students enrolled. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs. Additionally, when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

| Report Area | Total <br> Students | Number Free/Reduced <br> Price Lunch Eligible | Percent Free/Reduced <br> Price Lunch Eligible | Percent Students Eligible <br> for Free or Reduced <br> Price Lunch |

## Housing Cost Burden (30\%)

This indicator reports the percentage of the households where housing costs exceed $30 \%$ of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

| Report Area | Total <br> Households <br> Households (Housing <br> Costs Exceed 30\% of <br> Income) | Percentage of Cost <br> Burdened Households <br> (Over 30\% of Income) | Percentage of Households <br> where Housing Costs <br> Exceed 30\% of Income |  |

## Income - Families Earning Over \$75,000

In the report area, $22.72 \%$, or 3,075 families report a total annual income of $\$ 75,000$ or greater. Total income includes all reported income from wages and salaries as well as income from self-employment, interest or dividends, public assistance, retirement, and other sources. As defined by the US Census Bureau, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

## Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one house-hold has any income. A value of zero indicates perfect equality, where all households have equal income.
Index values are acquired from the 2010-14 American Community Survey and are not available for custom report areas or multicounty areas.

## Income - Median Family Income

This indicator reports median family income based on the latest 5 -year American Community Survey estimates. A family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption. Family income includes the incomes of all family members age 15 and older.

| Report Area | Total Family <br> Households | Average Family <br> Income | Median Family <br> Income | Median Family Income |

## Income - Per Capita Income

The per capita income for the report area is $\$ 17,312$. This includes all reported income from wages and salaries as well as income from self-employment, interest or dividends, public assistance, retirement, and other sources. The per capita income in this report area is the average (mean) income computed for every man, woman, and child in the specified area.

| Report Area | Total Population | Total Income $\mathbf{( \$ )}$ | Per Capita Income (\$) | Per Capita Income (\$) |
| :--- | :--- | :--- | :--- | :--- |
| Report Area | 55,214 | $\$ 955,902,408$ | $\$ 17,312$ |  |

## Income - Public Assistance Income

This indicator reports the percentage households receiving public assistance income. Public assistance income includes general assistance and Temporary Assistance to Needy Families (TANF). Separate payments received for hospital or other medical care (vendor payments) are excluded. This does not include Supplemental Security Income (SSI) or noncash benefits such as Food Stamps.

| Report Area | Total Households | Households with Public Assistance Income | Percent <br> Households with <br> Public Assistance <br> Income | Percent Households with Public Assistance Income |

## Insurance - Population Receiving Medicaid

This indicator reports the percentage of the population with insurance enrolled in Medicaid (or other means-tested public health insurance). This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.
$\left.\begin{array}{|l|llll|l|}\hline & \begin{array}{l}\text { Total Population } \\ \text { (For Whom } \\ \text { Insurance Status } \\ \text { is Determined) }\end{array} & \begin{array}{l}\text { Population } \\ \text { with Any } \\ \text { Report Area } \\ \text { Insurance }\end{array} & \begin{array}{l}\text { Percent of } \\ \text { Population } \\ \text { Receiving } \\ \text { Medicaid }\end{array} & \begin{array}{l}\text { Percent of Insured Population } \\ \text { Receiving Medicaid }\end{array} \\ \hline \text { Population } \\ \text { Receiving } \\ \text { Medicaid }\end{array}\right)$

## Lack of Social or Emotional Support

This indicator reports the percentage of adults aged 18 and older who self-report that they receive insufficient social and emotional support all or most of the time. This indicator is relevant because social and emotional support is critical for navigating the challenges of daily life as well as for good mental health. Social and emotional support is also linked to educational achievement and economic stability.

## Poverty - Population Below 200\% FPL

In the report area $50.23 \%$ or 25,245 individuals are living in households with income below $200 \%$ of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

| Report Area | Total Population | Population with Income at or Below 200\% FPL | Percent Population with Income at or Below 200\% FPL | Percent Population with Income at or Below 200\% FPL |

## Teen Births

This indicator reports the rate of total births to women age of $15-19$ per 1,000 female population age $15-19$. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.

|  | Female <br> Population <br> Age 15-19 | Births to <br> Mothers <br> Age 15-19 | Teen Birth Rate <br> Report Area <br> (Per 1,000 Population) |  |

## Unemployment Rate

Total unemployment in the report area for the current month was 1,961 , or $8.9 \%$ of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

| Report Area | Labor <br> Force | Number <br> Employed | Number <br> Unemployed | Unemployment <br> Rate |

## Air Quality - Ozone

Within the report area, 2.07 , or $0.56 \%$ of days exceeded the emission standard of 75 parts per billion (ppb). This indicator reports the percentage of days per year with Ozone (O3) levels above the National Ambient Air Quality Standard of 75 parts per billion (ppb). Figures are calculated using data collected by monitoring stations and modeled to include census tracts where no monitoring stations exist. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

## Air Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Stand ard ( 35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

## Climate Health - High Heat Index Days

This indicator reports the percentage of recorded weather observations with heat index values over 103 degrees Fahrenheit. The "heat index" is a single value that takes both temperature and humidity into account. The higher the heat index, the hotter the weather feels, since sweat does not readily evaporate and cool the skin. The heat index is a better measure than air temperature alone for estimating the risk to workers from environmental heat sources.

| Report Area | Total <br> Weather <br> Observations | Average <br> Index <br> Value | Observations <br> with High Heat <br> Index Values | Observations <br> with High Heat <br> Index Values, <br> Percentage | Percentage of Weather <br> Observations with High Heat <br> Index Values:\% |

## Food Access - Fast Food Restaurants

This indicator reports the number of fast food restaurants per 100,000 population. Fast food restaurants are defined as limitedservice establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

| Report Area | Total Population | Number of <br> Establishments | Establishments, Rate <br> per 100,000 Population | Fast Food Restaurants, <br> Rate (Per 100,000 Population) |

## Food Access - Grocery Stores

This indicator reports the number of grocery stores per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Included are delicatessen-type establishments. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores are excluded. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

## Food Access - WIC-Authorized Food Stores

This indicator reports the number of food stores and other retail establishments per 100,000 population that are authorized to accept WIC Program (Special Supplemental Nutrition Program for Women, Infants, and Children) benefits and that carry designated WIC foods and food categories. This indicator is relevant because it provides a measure of food security and healthy food access for women and children in poverty as well as environmental influences on dietary behaviors.

| Report Area | Total <br> Population <br> (2011 Estimate) | Number WIC- <br> Authorized <br> Food Stores | WIC-Authorized <br> Food Store Rate <br> (Per 100,000 Pop.) |

## Housing - Housing Unit Age

This indicator reports, for a given geographic area, the median year in which all housing units (vacant and occupied) were first constructed. The year the structure was built provides information on the age of housing units. These data help identify new housing construction and measures the disappearance of old housing from the inventory, when used in combination with data from previous years. This data also serves to aid in the development of formulas to determine substandard housing and provide assistance in forecasting future services, such as energy consumption and fire protection.

| Report Area | Total Housing Units | Median Year Structures Built |
| :--- | :--- | :--- |
| Report Area | 25,241 |  |
| Bath County, KY | 5,405 | 1980 |

## Housing - LIHTC

The Low Income Housing Tax Credit (LIHTC) program gives State and local LIHTC-allocating agencies the equivalent of nearly \$8 billion in annual budget authority to issue tax credits for the acquisition, rehabilitation, or new construction of rental housing targeted to lower-income households. This indicator reports the total number of housing units benefiting from Low Income Housing Tax Credits.

## Housing - Overcrowded Housing

This indicator reports data on overcrowded housing from the latest 5 -year American Community Survey. The Census Bureau has no official definition of crowded units, but this report considers units with more than one occupant per room to be crowded.

| Report Area | Total Occupied Housing Units | Overcrowded Housing Units | Percentage of Housing Units Overcrowded | Percentage of Housing Units Overcrowded |
| :---: | :---: | :---: | :---: | :---: |

## Housing - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1.01 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30 percent, and 5) gross rent as a percentage of household income greater than 30 percent. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard.

## Housing - Vacancy Rate

This indicator reports the number and percentage of housing units that are vacant. A housing unit is considered vacant by the American Community Survey if no one is living in it at the time of interview. Units occupied at the time of interview entirely by persons who are staying two months or less and who have a more permanent residence elsewhere are considered to be temporarily occupied, and are classified as "vacant."

| Report Area | Total <br> Housing Units | Vacant <br> Housing Units | Vacant Housing <br> Units, Percent | Vacant Housing <br> Units, Percent |

## Notes

## Clinical Care

A lack of access to care presents barriers to good health. The supply and accessibility of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

## Clinical Care Indicators

| Access to Primary Care | HIV Screenings | Lack of Prenatal Care |
| :--- | :--- | :--- |
| Access to Dentists | Pneumonia Vaccination | Lack of a Consistent Source <br> of Primary Care |

## Access to Primary Care

This indicator reports the number of primary care physicians per 100,000 population. Doctors classified as "primary care physicians" by the AMA include: General Family Medicine MDs and DOs, General Practice MDs and DOs, General Internal Medicine MDs and General Pediatrics MDs. Physicians age 75 and over and physicians practicing sub-specialties within the listed specialties are excluded. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

| Report Area | Total <br> Population, <br> 2012 | Primary Care <br> Physicians, 2012 | Primary Care Physicians, <br> Rate per 100,000 Pop. | Primary Care Physicians, <br> Rate per 100,000 Pop. |

## Cancer Screening - Mammogram

This indicator reports the percentage of female Medicare enrollees, age 67-69, who have received one or more mammograms in the past two years. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

| Report Area | Total <br> Medicare <br> Enrollees | Female <br> Medicare <br> Enrollees <br> Age 67-69 | Female <br> Medicare <br> Enrollees with <br> Mammogram <br> in Past 2 Years | Percent Female <br> Medicare <br> Enrollees with <br> Mammogram in <br> Past 2 Year | Percent Female Medicare Enrollees with Mammogram in Past 2 Year |

## HIV Screenings

This indicator reports the percentage of adults age 18-70 who self-report that they have never been screened for HIV. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

|  | Survey <br> Population <br> (Smokers <br> Age 18 ) | Total Adults Never <br> Screened for HIV / <br> Report Area | Percent Adults Never <br> Screened for HIV / <br> AIDS | Percent Adults Never Screened <br> for HIV / AIDS |

## Pneumonia Vaccination

This indicator reports the percentage of adults aged 65 and older who self-report that they have ever received a pneumonia vaccine. This indicator is relevant because engaging in preventive behaviors decreases the likelihood of developing future health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

## Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. In the report area, 730 Medicare enrollees with diabetes have had an annual exam out of 836 Medicare enrollees in the report area with diabetes, or $87.4 \%$. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

## High Blood Pressure Management

In the report area, $14.1 \%$ of adults, or 6,077 , self-reported that they are not taking medication for their high blood pressure according to the CDC's Behavioural Risk Factor Surveillance System (2006-2010). This indicator is relevant because engaging in preventive behaviors decreases the likelihood of developing future health problems. When considered with other indicators of poor health, this indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

| Report Area | Total <br> Population <br> (Age 18 ) | Total Adults Not <br> Taking Blood <br> Pressure Medication <br> (When Needed) | Percent Adults <br> Not Taking <br> Medication | Percent Adults with High Blood <br> Pressure Not Taking Medication |

## Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

| Report Area | Total Population | Number of Federally Qualified <br> Health Centers | Rate of Federally Qualified Health <br> Centers per 100,000 Population |

## Lack of Prenatal Care

This indicator reports the percentage of women who do not obtain prenatal care during their first trimester of pregnancy. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

| Report Area | Total Births | Mothers <br> Starting <br> Prenatal <br> Care in First <br> Semester | Mothers with Late or No Prenatal Care | Prenatal <br> Care Not <br> Reported | Percentage <br> Mothers with <br> Late or No <br> Prenatal Care | Percentage Mothers with Late or No Prenatal Care |

## Preventable Hospital Events

This indicator reports the discharge rate (per 1,000 Medicare enrollees) for conditions that are ambulatory care sensitive (ACS). ACS conditions include pneumonia, dehydration, asthma, diabetes, and other conditions which could have been prevented if adequate primary care resources were available and accessed by those patients. This indicator is relevant because analysis of ACS discharges allows demonstrating a possible "return on investment" from interventions that reduce admissions (for example, for uninsured or Medicaid patients) through better access to primary care resources.

## Notes

## Health Behaviors

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

|  | Health Behaviors Indicators |  |
| :--- | :--- | :--- |
| Physical Inactivity | Alcohol Consumption | Tobacco Usage - Quit Attempt |
| Fruit/Vegetable Consumption | Alcohol Expenditures | Tobacco Expenditures |
| Fruit/Vegetable Expenditures | Tobacco Usage - Current Smokers | Walking or Biking to Work |
| Soda Expenditures | Tobacco Usage - Former or Current <br> Smokers |  |

## Physical Inactivity

Within the report area, 12,643 or $29.9 \%$ of adults aged 20 and older self-report no leisure time for activity, based on the question: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?". This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as obesity and poor cardiovascular health.

| Report Area | Total <br> Population <br> Age 20 | Population with no <br> Leisure Time <br> Physical Activity | Percent Population <br> with no Leisure Time <br> Physical Activity | Percent Population with no Le <br> Time Physical Activity |  |

## Alcohol Expenditures

This indicator reports estimated expenditures for alcoholic beverages purchased at home, as a percentage of total household expenditures. This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as cirrhosis, cancers, and untreated mental and behavioral health needs.

| Report Area | State <br> Rank | Z-Score <br> (US) | Z-Score <br> (State) | Average <br> Expenditures <br> (USD) | Percentage of <br> Food-At-Home <br> Expenditures |

## Gateway Wellness Coalition

## Health Outcomes

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

## Health Outcomes Indicators

| Asthma Prevalence | High Blood Pressure (Medicare Population) | Mortality - Premature Death |
| :--- | :--- | :--- |
| Cancer Incidence - Breast | High Cholesterol (Adult) | Mortality - Stroke |
| Cancer Incidence - Cervical | High Cholesterol (Medicare Population) | Mortality - Suicide |

| Heart Disease (Medicare Population) | Mortality - Motor Vehicle Accident | STI - HIV Prevalence |
| High Blood Pressure (Adult) | Mortality - Pedestrian Accident |  |

## Asthma Prevalence

This indicator reports the percentage of adults aged 18 and older who self-report that they have ever been told by a doctor, nurse, or other health professional that they had asthma. This indicator is relevant because asthma is a prevalent problem in the U.S. that is often exacerbated by poor environmental conditions.

| Report Area | Survey Population <br> (Adults Age 18 ) | Total Adults <br> with Asthma | Percent Adults <br> with Asthma | Percent Adults <br> with Asthma |  |

## Mortality - Premature Death

This indicator reports Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death, age-adjusted to the 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

| Report Area | Total <br> Population, <br> 2008-2010 <br> Average | Total <br> Premature <br> Deaths, <br> 2008-2010 <br> Average | Total Years of <br> Potential Life <br> Lost, <br> 2008-2010 <br> Average | Years of <br> Potential Life <br> Lost, <br> Rate per <br> 100,000 <br> Population | Years of Potential Life Lost, Rate per 100,000 Population |

## Mortality - Stroke

Within the report area there are an estimated 46.5 deaths due to cerebrovascular disease (stroke) per 100,000 population. This is greater than than the Healthy People 2020 target of less than or equal to 33.8 . Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because stroke is a leading cause of death in the United States.
