

CENTER FOR HEALTH, EDUCATION AND RESEARCH Dedication Ceremony Friday, August 27

SCR Leaders, Sisters of Notre Dame and Rep. John Will Stacy pose for a ribbon cutting photo following the dedication

Governor Steve Beshear speaks to the MSU news crew following the dedication ceremony.

The new, \$30 million Center for Health, Education and Research located on the campus of St. Claire Regional Medical Center was dedicated Friday, August 27 in a joyful celebration that attracted more than 400 persons, including two governors.

The four-story, 90,000-square foot structure is a joint venture of Morehead State University, St. Claire Regional and the University of Kentucky.

Gov. Steve Beshear hailed the project as “an incredible example of our ability to find creative solutions to complex issues.”

State Representative Rocky Adkins described it as proof that “good things happen when people work together.”

The state-of-the-art structure was constructed on land provided by St. Claire Regional with funding from the state and federal governments. It is considered the first such partnership involving a regional public university, a land grant university and a private, nonprofit hospital corporation.

A variety of programs are housed in the new Center, including MSU’s bachelor’s and associate degrees in nursing, associate degree in radiologic sciences, and bachelor’s degrees in computed tomography/magnetic resonance and diagnostic medical sonography.

The facility also hosts St. Claire Regional’s family medicine clinic, St. Claire TeleCare, family medicine residency, certified registered nurse anesthetist program and the Northeast Kentucky Area Health Education Center (AHEC).

The University of Kentucky’s College of Medicine operates its Rural Physician Leadership Program, the third and fourth year of medical school, as well as the Center for Excellence in Rural Health, the Office of Research and Engagement for Advancing Community Health (REACH) and the Kentucky Homeplace Program.

In addition, CHER houses the master’s degree in physician assistant studies of UK’s College of Health Sciences. According to Andrews, Neff and Todd, a number of other program opportunities are being discussed with UK’s Colleges of Dentistry, Pharmacy and Public Health.

Sharing Hope

Getting the appropriate cancer care sometimes means patients must travel away from home. This can place an even bigger emotional and financial burden on patients and caregivers during an already challenging time.

The **Hope Lodge in Lexington, Kentucky**, provides free, overnight private rooms for cancer patients and their caregivers, creating an environment which eases both the stress of the cancer journey and the financial challenge of receiving lifesaving treatment.

UK Markey Cancer Center and St. Claire Regional Medical Center are partnering with our community to help hundreds of cancer patients and their families who stay at Hope Lodge.

We are hoping you can **donate paper towels, toilet paper, tissues, cleaning supplies, or laundry detergent** to help ease the load for these patients who come from all across Central and Eastern Kentucky.

By “Sharing Hope” we can all make a difference.

For more information contact:

Markey Cancer Center

Please bring donations to the drop box outside the SCR Gift Shop

Fostering a home-like environment, the Hope Lodge is equipped with a community dining room, kitchen facility, library, and laundry facility. And, most importantly, the Hope Lodge offers encouragement and support from others going through the cancer journey.
